## Event Report – “MockConnect”

The Data Science Club organized an interactive event titled “**MockConnect**” with the objective of providing students a realistic mock interview experience. The event was conducted to help students understand interview expectations and improve their confidence, communication, and overall interview performance.

The session began with a brief introduction explaining the purpose of the event. Students were informed that the interviews would focus on their personality, internships, academic courses, and career interests. This approach ensured that the interviews closely resembled real placement and internship interviews.

During the event, one student at a time was invited to the stage to participate in the mock interview. The interview panel included selected interviewers along with **Dr. Y. Anuradha**, who asked relevant and thoughtful questions based on each student’s background. The panel assessed students on their technical knowledge, clarity of thought, confidence, and communication skills.

At the end of each interaction, students received constructive feedback highlighting their strengths and areas for improvement. The event was engaging and informative, benefiting both the participants and the audience.

Overall, **MockConnect** was successfully conducted and served as a valuable platform for students to gain practical interview exposure and prepare for future academic and professional opportunities.

## Scope and Objective

By attending this event, students were able to:

- ✓ Gain practical exposure to real-time interview scenarios
- ✓ Improve communication and presentation skills
- ✓ Understand interview expectations based on internships and coursework
- ✓ Identify strengths and areas for improvement through feedback
- ✓ Build confidence and overcome interview anxiety

## Article

On **December 14, 2025**, the Data Science Club successfully organized **MockConnect**, a mock interview–based event designed to provide students with hands-on exposure to real interview scenarios. The event aimed to bridge the gap between academic learning and professional expectations by offering a realistic and interactive interview experience.

The session witnessed active participation from students across different years. One student at a time was invited to the stage to attend the mock interview. The interview panel consisted of selected interviewers along with **Dr. Y. Anuradha**, who asked questions tailored to each student’s personality, internships, academic background, and career interests. This approach ensured that every interview felt personalized and closely resembled real placement and internship interviews.

The atmosphere throughout the event was engaging and encouraging. Students demonstrated their communication skills, confidence, and technical understanding while responding to the questions. Observing peers participate also allowed the audience to gain insights into interview strategies, common questions, and effective ways of answering.

An important highlight of MockConnect was the constructive feedback provided by the interview panel. The feedback helped students recognize their strengths and identify areas that required improvement, such as technical clarity, communication style, or confidence. This made the session a valuable learning opportunity rather than a competitive activity.

Overall, **MockConnect** proved to be an impactful initiative that enhanced students’ interview readiness and professional awareness. The event successfully motivated students to prepare better for future opportunities, and the Data Science Club looks forward to conducting more such practical and career-oriented events in the future.
